**Re:** Verizon Fiber Optic

Dear Resident:

On 12/3/2024 Verizon started work in the Village installing fiber optic cables underground. These new cables will enable our residents to get high speed internet through Verizon.

The underground work will be performed in the grass areas of the village *Right of Way* and in certain areas of the roadway. Most, if not all of the properties end approximately 10 feet before the pavement of the road. All grass will be restored when the work is completed.

Overhead work will begin in 2-4 weeks and will utilize the existing power line poles throughout the village. The underground work will only effect blocks with underground wiring.

We thank you for your understanding and patience.

Best wishes

Mo Blinder

Mayor Village of Hewlett Neck
